

SUSTAINABLE REDWOOD LECTURE SERIES presents

An Evening with Dr. Danielle Marceau, University of Calgary

Changing Hydrology and Land Use in the Elbow River Watershed

Tuesday, May 12th, 7:00-8:30pm

Redwood House, #1 Manyhorses Drive, Redwood Meadows

Dr. Marceau is Professor/Schulich Chair in GIS and Environmental Modelling, Department of Geomatics Engineering, and Associate Head of Graduate Studies at the University of Calgary.

Her research focuses on developing spatial simulation models to study *coupled natural/human systems* in which human activities interact with natural landscape components, raising complex issues of environmental resource management. Her

research can help us to understand the impact of land-use and climate change on the hydrology of the Elbow River watershed while taking into account the stakeholders' perspectives regarding land development.

This is a free event but donations at the door will be gratefully accepted.

Light refreshments will be provided.
